**CONTROLLED INVENTORY ITEM CODES (CIIC CODES)**

**CIIC Codes are from Table 61 in DoD 4100.39-M, Volume 10, Chapter 4. These codes consist of one character (alphabetic or numeric) to indicate the security classification and/or security risk or pilferage controls for storage and transportation of DoD assets. These codes were formerly referred to as Physical Security/Arms, Ammunition and Explosives Security Risk/Pilferage Codes (SEC).**

**CIIC Codes include Classified Item Codes, Pilferage Codes, and Sensitive Item Codes. These three groups of codes are listed below.**

**CLASSIFIED ITEM CODES**

This code indicates that the materiel requires protection in the interest of national security in accordance with the provisions of DoD 5200.1-R, Information Security Program. Do not accept property with Classified Item Codes of A through U at the DRMO, physically or in-place.

**CODE      EXPLANATION**

<b>A</b>	Confidential - Formerly Restricted Data
<b>B</b>	Confidential - Restricted Data
<b>C</b>	Confidential
<b>D</b>	Confidential - Cryptologic
<b>E</b>	Secret - Cryptologic
<b>F</b>	Top Secret - Cryptologic
<b>G</b>	Secret - Formerly Restricted Data
<b>H</b>	Secret - Restricted Data
<b>K</b>	Top Secret - Formerly Restricted Data
<b>L</b>	Top Secret - Restricted Data
<b>O</b>	Item contains naval nuclear propulsion information. Disposal and access limitations are identified in NAVSEAINST C5511.32. Store and handle in a manner which will preclude unauthorized access to this material.
<b>S</b>	Secret
<b>T</b>	Top Secret
<b>U</b>	Unclassified
<b>7</b>	Item assigned a Demilitarization Code other than A, B or Q, for which another CIIC is inappropriate. The loss, theft, unlawful disposition, and/or recovery of an item in this category will be investigated in accordance with DoD 4000.25-2-M and DoD 7200.10-M.

**CONTROLLED INVENTORY ITEM CODES (CIIC CODES)****CLASSIFIED ITEM CODES**

(Continued)

- 9** This code identifies an item as a Controlled Cryptographic Item (CCI). CCI is described as secure telecommunications or information handling equipment, associated cryptographic component, or other hardware item which performs a critical COMSEC function. Items so designated are unclassified but controlled, and will bear the designation "Controlled Cryptographic Item" or "CCI". **Do not accept property with a CIIC 9 (FSC's 5810 or 5811). 3 Apr 03**

**NOTE: Codes for Department of Energy (DOE) Special Design and Quality-Controlled items under management control of the Defense Nuclear Agency (DNA) (identified by CAGE Code 87991) in the Defense Logistics Supply Center FLIS data base will be assigned and processed in accordance with DOE-DNA TP100-1, Supply Management of Nuclear Weapons Materiel.**

**PILFERAGE CODE**

**DEFINITION:** A code indicating the material has a ready resale value or civilian application for personal possession and, therefore, is especially subject to theft.

**CODE DESCRIPTION**

- J** Pilferage - pilferage controls may be designated by the coding activity to items coded **U** (Unclassified) by recording the item to **J**

**Activities may further categorize pilferage items by using the following codes:**

**SENSITIVE ITEM CODES**

**DEFINITION:** This code is for material which requires a high degree of protection and control due to statutory requirements or regulations, such as narcotics and drug abuse items; precious metals; items which are of high value, highly technical or of a hazardous nature; and small arms, ammunition, explosives and demolition material. (One of these codes may appear on the Receipt Screen as a result of a NIIN characteristic search.)

**CODE      DESCRIPTION**

<b>1</b>	<b>HIGHEST SENSITIVITY (CATEGORY I)</b> Non-nuclear missiles and rockets in a ready-to-fire configuration, (e.g., Hamlet, Redeye, Stinger, Dragon, LAW, Viper) and explosive rounds for non-nuclear missiles and rockets. This category also applies in situations where the launcher (tube) and the explosive rounds, though not in read-to-fire configuration, are jointly stored or transported.

<b>\$</b>	This code identifies Nuclear Weapons Use Control (UC) Ground Equipment which is CIIC unclassified but may require special controls. Use Control Ground Equipment is described as recorders, verifiers, adapters, power supplies, cables, programmers, monitors, controllers, code processors, power converters, computers and data modules which perform a Nuclear Weapon Use Control Function.

**NOTE 1:** CIIC \$ is not a valid input code for FLIS. This code is unique to DNA only.

**CONTROLLED INVENTORY ITEM CODES (CIIC CODES)**

**DEMILITARIZATION CODES**

**DEFINITION:** A code assigned to an item by the Item manager to identify the required demilitarization.

TABLE ID: DMIL

CHARACTER LENGTH: 1

DATA TYPE: ALPHA

**CODE DESCRIPTION**

- |          |  |
|----------|--|
| <b>A</b> | Non-MLI/ <b>Non-CCLI</b> -- Demilitarization not required  |
| <b>B</b> | MLI (Non-Significant Military Equipment - <b>Non-SME</b> ) -- Demilitarization not required. Trade Security Controls (TSCs) required at disposition.   |
| <b>C</b> | MLI ( <b>SME</b> ) -- Remove and/or demilitarize installed key point(s) as prescribed in the Defense Demilitarization Manual, or lethal parts, components and accessories.   |
| <b>D</b> | MLI ( <b>SME</b> ) -- Total destruction of item and components so as to preclude restoration or repair to a usable condition by melting, cutting, tearing, scratching, crushing, breaking, punching, neutralizing, etc. (As an alternate, burial or deep water dumping may be used when coordinated with the DoD Demilitarization Program Office.)   |
| <b>E</b> | MLI ( <b>Non-SME</b> ) -- Additional critical items/materiel determined to require demilitarization, either key point or total destruction. Demilitarization instructions to be furnished by the DoD Demilitarization Program Office.  |
| <b>F</b> | MLI ( <b>SME</b> ) -- Demilitarization instructions to be furnished by the Item/Technical Manager.   |
| <b>G</b> | MLI ( <b>SME</b> ) -- Demilitarization required. AEDA. Demilitarization, and if required, declassification and/or removal of sensitive markings or information, will be accomplished prior to physical transfer to a DRMO. This code will be used for all AEDA items, including those which also require declassification and/or removal of sensitive markings or information. (Special Handling Code <b>3</b> applies.) |
| <b>P</b> | MLI ( <b>SME</b> ) -- Security Classified Item -- Declassification <b>and</b> any additional demilitarization and removal of any sensitive markings or information will be accomplished prior to accountability or physical transfer to a DRMO. This code will not be assigned to AEDA items.  |

**NOTE:** Any item received at the DRMO with DEMIL P will not be processed for disposal without the required certificate of declassification and a certificate of demilitarization. If the required certificates cannot be provided by the generator, the DRMO Chief and host security must be notified immediately. Place the item(s) in a secured area until host security arrives to return the property to the generator. See Supplement 1, this instruction, for a list of Classified Item Codes. If the required certificates are provided, the DRMO may process the item(s) with DEMIL Performed Code 6 (MLI residue) or 7 (non-MLI residue).

**DEMILITARIZATION CODES (Continued)**

- Q** CCLI – Commerce Control List Item formerly Strategic List Item (SLI) -- Demilitarization not Required. CCLI are non-MLI and are controlled by the U.S. Department of Commerce through the Export Administration Regulations (EAR) and indicated on the Commerce Control List (CCL). Each CCL entry is preceded by a four-digit Export Control Classification Number (ECCN) and those ECCNs ending in the letter A or B are defined as Commerce Control List Items. These items are subject to Import Certification and Delivery Verification (IC/DV) control and other Trade Security Controls.
- X** Indicates that demilitarization requirements or MLI applicability not determined by the ICP; local determination necessary prior to disposal action. Not a valid code for accountability acceptance **or** for system input. The system will require you to input a challenge.

**NOTE: Change 1 to DoD 4160.21-M-1, DEMIL Manual, deleted DEMIL Codes H, J, K, L, M and N. The majority of items with these DEMIL Codes has been changed. However some items remain unchanged in the database. The following FSCs/FSGs that have been previously assigned DEMIL Codes H, J, K or M are considered critical: 10, 11, 12, 13, 14, 18, 58 (except 5805, 5815, 5830-36, and 5895), 6615, 6920, 6930, 6940, 8470 and 8475. Process non-critical property with DEMIL Codes H, J, K and M as DEMIL required overseas and as DEMIL B in CONUS. If an item is obviously miscoded, (J which should be A or J which should be D) submit a DEMIL challenge. Or if you receive property that is listed in the FSCs or FSGs that are considered critical, submit a DEMIL challenge and include "obsolete". See DRMS-I 4160.14, Volume VII, Chapter 2, paragraph F, for DEMIL challenge guidance.**

**DEMILITARIZATION PERFORMED CODES**

**STANDARD WASTE AND SCRAP CLASSIFICATION (SCL) CODES**

**DEFINITION:** SCL codes are used to classify scrap into its proper scrap commodity group to obtain maximum sales potential and to provide a uniform method for maintaining accounting records. These codes do not apply to property in other than scrap condition, i.e., that which has value other than for its basic material content. Use of SCL codes other than those listed herein is not authorized. **The existence of an SCL code is not justification for downgrading an item to scrap. If other requirements forbid the downgrading of property to scrap, even though it is in scrap condition, such property will not be downgraded.**

**NOTE:** Use numeric in the second and third position, except for SCLs E1O and SLO, use Alpha O.
